LIFE IN THE FAST LANE

Most have trouble backing out of their driveways. One has even had his cat run over. Now, Cal Poly students and longtime San Luis Obispo residents are intent on...

Slowing down Chorro

By Shelly Karlson
Daily Staff Writer

In a rare showing of solidarity, Cal Poly students teamed up with long-term residents Monday evening to find a way to slow traffic careening down Chorro Street.

The group of concerned residents, known as the North Broad/Chorro Neighbors, held a potluck dinner and support rally to expose the community to the negative impact traffic has made on their neighborhood.

Students and residents said traffic problems on their streets are so bad they often can't back out of their own driveways.

They added the streets have proven hazardous.

Kip Anderson, an industrial technology junior, said his cat suffered serious brain damage after being struck by a fast-moving car in front of his house.

He said it cost more than \$500 in veterinary bills to nurse the animal back to health after the hit-and-run.

"My cat was never the same after the accident," Anderson said.

Members of North Broad/Chorro Neighbors task force include the residents of upper Chorro and Broad street neighborhoods, bounded by Foothill Boulevard, Highway 101, Santa Rosa Street and San Luis Mountain.

Since its formation in March, the task force has attempted to find solutions to the excessive traffic that the neighborhoods of Broad and Chorro streets endure daily.

Resident George Griffin, a coordinator for North

Poly a 4 to 5 year sentence for transfers

Many students find junior college units useless here

By Jennifer Sablan
Daily Staff Writer

A university report released in late April shows Cal Poly's transfer students take almost as long as first-time freshmen to graduate.

Though the report offers no specific reasons for the delay, it shows most students take four to five years to finish their programs. The report indicated that only 26.3 percent of students who transferred to Cal Poly in 1991 — usually after two or three years at a community college — are graduating in 1994.

According to Elaine Ramos-Doyle, associate director for Institutional Studies, a variety of complicated factors contribute to the length of time students spend at Cal Poly.

However, one measurable statistic indicates that students take an average of 13.7 units a quarter. Most curriculums, according to Ramos-Doyle, require students to take 16 units per quarter if they want to graduate in four or five years.

Often transfer students carry more of their own financial burdens. As jobs conflict with school, less units may be the only feasible solution.

"Freshmen tend to be funded by parents," said electronic engineering senior Eric Nystrom, a transfer student from Air Force Technical School. "Students who went to (junior college or armed forces) first are usually putting themselves through school."

"The curriculum for engineering specifies 16 to 17 units a quarter and that's too much to balance with work," he added.

Student money may fund sand volleyball courts

By Suzanne Moffatt
Daily Staff Writer

The ASI Board of Directors is currently discussing a plan to build two sand volleyball courts on the east side of the Rec Center Pool.

The courts would cost an estimated \$55,000 in student money, which is proposed to be funded from the Union Executive Committee's surplus budget.

According to Chair Steve Steinhauer, the UEC is running approximately \$350,000 ahead of budget for the year.

"It's not like you have to spend (that money)," Steinhauer said. "But this is something that staff brought to us and there seems to be a demand so we wanted to take it to the Board."

Board members began discussion of this request last week in a workshop and the proposal is expected to be approved at next week's ASI board of directors meeting.

Rec Sports Assistant Director Bill Ashby presented the plans for the volleyball courts to the Board Monday night.

Ashby said the State offered the land on the east side

ASI unsure of Open House financial success

By Cynthia E. Buizer
Daily Staff Writer

While the City of San Luis Obispo has tallied its cost for this year's Open House, ASI officials said they may never know exactly how much clubs made or the event cost.

But an ASI survey of several of the 200-plus clubs who participated found most were satisfied with their individual contributions and earnings from Open House.

Police Chief Jim Gardiner said his department spent an extra \$2,100 during Open House weekend, April 21-23.

Gardiner said police used both a "shift adjustment" program to switch

the duty shifts of some police officers and overtime pay to ensure a maximum number of officers were on duty at all times.

Although Open House cost police more than \$2,000 in overtime, Gardiner said he was not upset about it coming out of his budget. He said the "(City) Council policy at this point is not to charge back" to organizations for special event security.

But ASI has yet to determine how much it spent presenting this year's Open House — the first such campus-wide festival since the 1990 cancellation of Poly Royal.

ASI Accountant Harvey Blatter said invoices should be available by

June 1 to show what ASI paid to sponsor the festival. But no paperwork was required of clubs, making it difficult to determine how much clubs spent or made on the event.

Unlike past Poly Royals, Open House planners did not require clubs to present financial reports to ASI. Previously, those reports were used to disclose earnings and determine the tax clubs were required to pay for participation in the event, according to ASI Vice President for Finance Shawn Reeves.

But this year, the taxes were abandoned.

TRANSFERS: Poor junior college advising contributes to Poly's graduation woes

From page 1

Money is a major factor, agreed civil engineering senior Everett Penn, who began college in 1981.

"If I had money, I could (graduate) in four years," he said. "But I had to take a lighter load to balance out with work."

Other students say they would take the required units — if they could get into their classes.

"At Cal Poly, the classes are just not available," said mechanical engineering senior Jesus Estrada, who transferred to Cal Poly from San Joaquin Delta College. "Senior priority is not worth anything, because anybody can get it."

He referred to Cal Poly's recently instituted practice of offering three quarters of senior priority to be used at students' discretion during their enrollment.

Computer engineering senior Patrick Stevenson, who transferred from Southwestern University in Chulavista, said the registration system at Cal Poly is not as efficient as it could be. He claimed allowing instructors to add students without using CAPTURE — the university's telephone registration system — would make it easier for students to get the classes they need.

Associate Vice President for Academic Resources Charles Crabb said some students must accept responsibility for the length of time it takes them to graduate. He said some may have taken courses that don't fit in the Cal Poly curriculum.

"(Students) might be testing majors at a community college and eventually decide on a major when they get (to Cal Poly)," he said. "Because of the well-defined curriculums, the architecture or business class taken at a community college has absolutely no value at Cal Poly."

Computer science senior Dave Glaeser, who will have attended college for more than seven years by the time he plans to graduate, agrees some courses have "absolutely no value" at Cal Poly. In Glaeser's case, it is not because he took courses which were not in his curriculum.

Glaeser said at one time Modesto Junior College (MJC) and Cal Poly agreed to teach computer courses in the same language and the courses would transfer. During Glaeser's time at MJC, he said Cal Poly changed the language it used and no one told him. Therefore, he had to retake courses in a different language when he arrived at Cal Poly.

"It was really annoying," Glaeser said. "I have eight gajillion elective units. The computer science degree requires 192 units and I'll graduate with 250 to 260 — some ungodly number. That seems to be really silly."

Other students agree that the transfer process is crazy and that a variety of factors play a part in the breakdown

of the transferring process. Everything from poor advice to poor communication among colleges was cited as a cause of the problem.

Not everyone had a horror story to tell, however. Art and design senior Steve Mortensen said he attended De Anza College in Cupertino and experienced no problems with his transfer. He attended the junior college for two years and Cal Poly for three.

"That was the plan all along," Mortensen said. "It was a smooth transition... they have a very good system (at De Anza). They have a book that listed the courses at De Anza and the corresponding courses at Cal Poly."

But social science senior Eileen O'Halloran doesn't advise other students to place much faith in books such as the one Mortensen described.

"(Foothill College) had a guideline sheet that said, 'Take these classes and you'll do fine,'" she said. "(But) I took (classes) in one area and when I got here (Cal Poly administrators) said, 'No, you needed to take it in this area.'"

Both Crabb and Associate Vice President for Academic Programs Glenn Irvin noted that some students are not getting adequate preparation from community college advisers.

"We have a sense that students don't get good advice," Irvin said.

"The counselors may have told the student to take one course but never actually opened up the Cal Poly articulation agreement," Crabb said. "Articulation agreements define which classes students can take that transfer over to (four-year colleges) Courses that may articulate at another four-year college may not at (Cal Poly)."

Irvin said some students may take longer to graduate because they started out behind the others.

"They may start lower than the curriculum specifies," he said. "For example, if you are an engineering major that needs to take calculus courses and you start out with algebra at the junior college, then it will take longer to complete a degree. We try to put a premium on students who have adequate preparation."

But Nystrom noted that even students who are adequately prepared are having to spend a long time at Cal Poly. He attended Air Force Technical School for five months of intensive training in electrical systems and then worked in the Air Force for four years. But Cal Poly did not give him credit for any of his classes or experience.

"Some colleges take tech school degrees... and some won't," he said.

Nystrom granted that some classes at Cal Poly "went

Hall opens after week of cleaning

SAE recruits to pay facility's mop-up bill

By Lori Witmer
Daily Staff Writer

The Achievement House's Good Neighbor Room fully reopened on Friday after being closed for a week for cleanup. The room had been closed because of a party that got out of hand on April 28.

The party was hosted by the spring pledge class of Sigma Alpha Epsilon fraternity.

The managers of the Achievement House found the room in shambles the morning after the party, with broken lights, puddles of alcohol on the floor, trash all over, and broken glass outside.

"The group cleaned it up considerably, but the carpet still smelled, so we had to call in a professional to clean and freshen it up," Achievement House accountant Bonnie Coltey said.

Coltey said although the kitchen off the Good Neighbor Room was reopened last Tuesday, Achievement House's clients had to eat their meals outside until the carpet in the main hall could be cleaned professionally.

"We were lucky it didn't rain," Coltey said.

Coltey declined to state how much Sigma Alpha Epsilon was billed for the damages.

"We tried to be generous and not charge them a whole lot," Coltey said.

Sigma Alpha Epsilon President Matt Macomber said he didn't know the total amount for the damage bill and therefore would not say who will pay.

"If it turns out to be a large amount, the pledges will have to organize fund raisers, in which the whole house will participate, to defer the costs," he said. "The pledges know what they've done wrong and understand their responsibilities."

Mandela gets warm welcome in long-awaited inauguration

By John Daniszewski
Associated Press

PRETORIA, South Africa — The day that millions dreamed of and many died for finally arrived Tuesday when Nelson Mandela recited the oath of office to become South Africa's first black president.

With the words, "Never, never and never again," he banished the racial oppression he fought all his life and pledged a better future for all his compatriots — black and white.

The beginning of his administration coincided with what many South Africans deemed the birth of their new nation. "The Second South African Republic," was how one television commentator put it.

Watched by international

visitors including Vice President Al Gore, Palestinian leader Yasser Arafat and Cuban President Fidel Castro, Mandela in deep, measured tones swore allegiance to the new republic and its constitution.

As he said, "So help me God," at 12:17 p.m., shouts of "Viva" rang out and a joyous roar rose from the throngs spread out on the lawns and terraces below.

Mandela was elected president Monday in Cape Town by the first South African parliament to include members of the black majority.

Deputy Presidents de Klerk and Thabo Mbeki, an African National Congress stalwart considered Mandela's heir apparent, took their oaths of office just before Mandela.

Cleaning up their act — and the dance hall

"There was beer all over the dance floor,
and the band was playing rhythm and blues,
You got down and did the gator
and a half an hour later
you were barfing all over your girlfriend's shoes..."
The Eagles
"The Greeks Don't Want No Freaks"

Unfortunately, that's the song more than a few county facility owners might start humming when they think of turning over their property to any of Cal Poly's fraternities and sororities. Increasingly, those owners are saying "no" to Greek organizations who wish to rent ballrooms and dance halls for their social events. And there's a pile of evidence that says this backlash is well-deserved by some fraternities and sororities who've worked overtime earning it.

A few things disturb us about the trend against renting to Greeks. We don't like to see community members making generalizations about other members of the student body based on their limited experience with a couple of unruly organizations. It's wrong to make an inference about how one fraternity will behave based simply on negative interaction with another.

'We think there's a heightened degree of responsibility that comes with renting someone else's property. It means taking care of those who become inebriated.'

Greeks are involved in several worthwhile, charitable efforts that naturally earn them less publicity than their negative misdeeds. And it's wrong to infer all fraternity and sorority members are drunken mongrels who have little respect for private property.

Yet there's no denying the complaints of several facility owners, who specifically blame Greek organizations for tearing apart their property. Their litany of vomit-laden, urine-stained "mornings after" tales doesn't help the overall image of Cal Poly students, let alone Greeks. In fact, they stand as evidence to the contrary. And we don't think students should exactly be proud of how well their university's Greek system is apparently policing itself.

We encourage the newly-elected leaders of the Interfraternity Council and Panhellenic to use this mounting body of rejection by facility owners as a sort of call to arms. It's clear that a problem exists. They should take whatever punitive or preventive action they can to encourage — or force — responsible merrymaking. The consequences for not doing so are already floating in poor Mr. Madonna's pond.

We can't help but pause to sadly note the horrendous amount of alcohol abuse that is almost entirely behind the problems. The Daily has often editorialized in favor of on-campus alcohol sales, and allowing dorm residents to keep alcohol in their rooms. We think responsible student alcohol use is, for many, as much a part of college life as midterms and senior projects. So we're not saying to Greeks: "Don't drink at your social functions."

But we think there's a heightened degree of responsibility that comes with renting someone else's property. It means taking care of those who become inebriated there. And — how else can we say this — if others throw up, it means cleaning up after them.

We hope those in Greek leadership positions take steps to turn the tide on facility rentals throughout the county. That begins by more responsible use of the facilities that do rent to them, and quick, honest atonement when the party turns sour.

Carolyn
NIELSEN

Will anyone here help women take back the night?

It was a year ago this month that I sat at my computer terminal — my stomach in knots and my mind filled with rage as I typed out a story about a rape that had occurred on campus.

It couldn't have been more than a few hours later that we got word in the newsroom that there had been another attack, this one at the intersection of Foothill and Santa Rosa, just blocks from school. And only a few days later, I found myself scanning the police report of a third assault.

As the Daily's city editor, it was my job to call the police and record the scant details to put together the best story I could — and to do it without emotion. To keep feelings out of a story is one thing. But to keep them out of my heart is something else.

What got to me the most was the inch-thick police report with the victims' statements. When I got to the part with the drawings of the physical damage inflicted on them, and read in their own words what had happened to them, I ran to the bathroom and threw up.

I never met these women; I never even spoke with them. And I don't pretend to know what they felt. But I know how I felt: Enraged.

A few months later, another student was attacked and sodomized on the hood of a car in a campus parking lot. And those were just the incidents that we heard about, which were just a select few of those which ended up being reported.

San Luis Obispo provides its residents with a false sense of security. And don't think the Cal Poly Administration hasn't had its guilty hands in the bucket of whitewash used to cover up anything which might mar the pure reputation of this little haven.

Case in point: Rape figures are vastly underreported because Public Safety and the San Luis Obispo Police Department are either too unconcerned or too stupid to collaborate on their investigations. I don't want to hear some excuse about how the campus is an unincorporated area, separate from the city — save that for someone naive enough to be satisfied with that flimsy excuse. The simple fact is that if a rape occurs on campus and the victims report it to city police, it goes into city statistics. But if it is reported to Public Safety, it

goes on to the campus record.

The actual figures are split up, and the result is an unrepresentative crime statistic.

Cal Poly has just as many sexual assaults as most campuses — just ask someone at the Rape Crisis Center. But we are not told the truth because it's bad publicity. Maybe that's also the Administration's motive for not putting in some decent lighting. The lighting issue has been discussed ever since I have been a student here — and that's just it: all talk, no action. Sure, we got those little yellow call boxes. But really, how effective can those be in an emergency? "Excuse me, but can you untie my hands so I can run 100 yards over yonder and depress the button on that yellow box?"

Rather than admit there is a problem and try to better the campus safety standards, the Administration perpetuates a "See no evil, hear no evil, speak no evil" attitude from their comfy throne up on the hill while students are being raped in the parking lots down below.

So kudos to the handful of women who are demanding that their voices be heard. Even though this will be the fourth one, I doubt many students at Cal Poly know what "Take Back the Night" is, but all of them should. "Take Back the Night" is an acknowledgment of what society and the Administration try to ignore. It's about empowerment and awareness and placing blame on the perpetrator, not the victim.

Next week, keynote speaker Mary Tesoro, who co-founded a program called Model Mugging, will give a presentation about self-defense. It's not just about screaming and learning how to kick or poke someone in the eye. It's about asserting your rights and not giving up your power. And it's not just for women.

I hope men do feel that the issue of rape is not just a women's issue, but a human one. One of the events for "Take Back the Night" is a candlelight march to every spot on campus where a person has been assaulted. And according to the statistics, we are all likely to play either the role of victim or loved one at one point in our lives. None of us want to feel like we will be in this situation. But ignoring it is not going to help the problem — only awareness can. And a solution without a voice is not going to help anyone. I personally don't want to feel that if only I would have spoken up, someone I love — or myself — would have never had to go through hell.

• Carolyn Nielsen is a Daily senior editor.

LETTERS POLICY

Mustang Daily welcomes letters and commentaries from students, staff, and other community members. Letters should be typed, double spaced and under 250 words. Commentaries should be typed, double spaced, and 750 to 1,000 words.

All authors must include a name, signature and phone number. Students should include their major and class standing. Mustang Daily reserves the right to edit letters for clarity, grammar, and length.

Submissions can be brought, mailed, faxed or E-mailed to: Mustang Daily
Graphic Arts Bldg #226, Cal Poly, San Luis Obispo, CA. 93407
FAX: (805) 756-6784
E-Mail: gjoynt@oboe.calpoly.edu

OPINION POLICIES

Editorials represent the majority opinion of the Mustang Daily Editorial Board. The board consists of the newspaper's nine editors; each represents one vote on the board.

Commentaries can be either unsolicited or solicited by the opinion editor. Often, they are longer-form letters to the editor that the editor decides to give larger prominence. But commentaries aren't representative of the newspaper's stance on any given issue.

Reporter's notebooks are opinion commentaries written by members of the Daily's reporting staff. The Daily receives many **letters to the editor**. Its editors print those they consider most relevant to the campus, and are the best-constructed of those submitted. Letters which adhere to the Daily's policies and address timely issues typically receive priority.

WE RACE YOU WIN!

Professional racing is hell on a car. Every mile on the track is like a hundred on the street. As race car builders, we follow a car through its entire life span - often only a matter of hours.

What we've learned at Le Mans and Daytona applies directly to the way we maintain your car. We'll tune it for top performance and make the minor repairs that can save you a major overhaul further down the road. Our prices are reasonable and our service is the best.

Racing car owners trust us, shouldn't you?

Girl says Klaas suspect 'didn't look mean'

Hearing for Richard Allen Davis begins

By Dara Akiko Tom
Associated Press

SANTA ROSA — The man charged with kidnapping and murdering Polly Klaas didn't look mean and said he wasn't going to hurt her, Polly's friend said in court Tuesday.

The girl's testimony came at a preliminary hearing in Sonoma County Municipal Court for Richard Allen Davis, the man accused of kidnapping and murdering 12-year-old Polly.

"He didn't look mean or menacing," said Gillian Pelham, who was at Polly's home Oct. 1, 1993, the night Polly was abducted. Pelham said the abductor told the girls, "I'm not going to hurt you. I'm not going to touch you. I'm just doing it for the money."

Polly was taken from her bedroom at knife point as her two friends watched in horror.

Davis told the girls to "count to 1,000 and after we did that Polly would be back with us," Pelham said.

The other friend with Polly that night was Kate McLean, who testified that she at first thought the incident was a prank.

"I assumed it was some kind of trick or joke, that Polly had gone too far. I didn't find it very funny," said McLean, who was holding a stuffed bear and wearing a pin with Polly's picture on it.

CHORRO: Trying to curb the need for speed

From page 1

Broad/Chorro Neighbors, said there are several traffic issues the group is focusing on.

Standing in the middle of Chorro Street during Monday evening's rush hour, Griffin stopped drivers and handed them fliers which implored commuters to slow down and possibly use alternate routes.

"We have devised a list of goals in which we are addressing issues such as safety, those directly related to cars and the feeling and tone of our community," he said.

These goals entail limiting general traffic noise, fast driving, pollution and creating a safer environment for children and residents.

"We hope to achieve these goals, but we can't until we implement a program that will limit the speed and volume of traffic that passes through our neighborhood," Griffin said.

San Luis Obispo Associate Planner Jeff Hook said a 1992 study found approximately 14,100 vehicles per day use Chorro Street.

Griffin said he believes the number of cars traveling through the neighborhood has steadily escalated.

"In the last five years the traffic problem has grown worse, and I think all of the residents can handle that," he said. "Yet, what we find amazing is the low consciousness of the people who drive down our street."

Resident Beverly Ensing said she agrees with Griffin. She said many commuters do not care if they travel through the neighborhood at high speeds.

"That's what gave me the idea about posting the signs," she

said. "I wanted every driver in every car to know that this neighborhood has children, pets and grandparents that live here."

About a month ago, Ensing began posting signs that read "Please slow down — children live here," and "This is a neighborhood, not a freeway" along Chorro Street.

"I think these signs have done a tremendous amount of good because once a driver sees the sign, they are aware that they need to slow down," she said.

Chorro Street resident and civil engineering senior David Tait conducted a transportation survey of the city of San Luis Obispo as part of his senior project. He said Chorro Street was one of the trouble spots.

"I think the signs are good, but it's not enough to stop our traffic problems," he said. "We need to devise a program for traffic-calming measures, such as speed bumps or bulb-outs, so that drivers have to slow down."

Bulb-outs are elements such as trees which are added along a street to prevent motorists from seeing a long, straight stretch of road.

San Luis Obispo Mayor Peg Pinard and City Councilmembers Bill Roalman and Allen Settle met with residents at separate times Monday. Roalman said the city plans to listen to the residents' complaints and allocate money to implement a traffic plan.

"In June, we will be adopting the new circulation element of our general land use plan," he said. "And in that, we will specifically address the traffic issues that North Broad/Chorro Neighbors have brought up about their community."

OPEN HOUSE: Little club paperwork required

From page 1

Brown said "ASI didn't want to get into the business of taxing clubs."

Brown said he felt requiring clubs to submit the forms would have meant too much paperwork and might have deterred participation.

Instead of paying taxes, each club this year was required to pay a flat \$20 participation fee.

But the flat rate participation fee made it impossible to gauge the financial success of the event.

Additionally, it has not been made clear if the flat rate paid by clubs will be enough to fund a festival again next year should it be approved by Cal Poly President Warren Baker.

In the past, tax money from clubs was used to fund the following year's event.

Blatter also said that "when we had Poly Royal, we knew it was a pretty valid budget."

What is known about this year's Open House budget is that a \$5,000 allocation was granted by ASI, Foundation donated about \$3,000 and about \$500 was donated by alumni, Reeves said.

To try to better gauge the financial success of the event, Reeves said the Open House Committee may decide to run a report to see how much money was deposited in each club's ASI account to help with next year's planning. But Reeves noted many clubs have off-campus accounts, so the report could only provide a "ball-park figure."

ASI Public Relations Chair Mary Kay Duffy said an informal poll of about 20 clubs was conducted at about 2:30 p.m. on Saturday of Open House, and 19 of the clubs said they broke even or made money.

"Quite a few booths had sold out by 3 p.m.," Brown said. "(Hot) food booths on the most part did really well, as did drink stands."

The College of Business expects to receive information about the success of Open House in "about another week or so." No other colleges are conducting formal surveys.

Clubs and organizations overall seemed pleased with their financial results.

"We broke even (selling popcorn)," said American Marketing Association president Rex Beishline. "We came out maybe \$20 ahead, and we were satisfied because there wasn't a lot of enthusiasm and because of the (rainy) weather."

MEChA President Jose Urquiza said his club sold carne asada. Urquiza said MEChA "didn't know what to expect, but (the club) made some money."

The Scuba Club made between \$50 and \$100, according to President Rick Carlile.

"Our fish and chips booth basically covered our costs," said Carlile. "But, we're sure that next year it'll be cheaper (because we now have the tank and booth ready.) It's still a great thing for publicity and it should help membership."

Ski Club President Steve Burgess also was optimistic about next year's Open House.

"We put a lot into our booth, so we didn't quite break even," Burgess said. "We're mainly hoping that next year other clubs will get into (creating their booths) like we did and put some enthusiasm into it."

into a different realm than what I got in the service."

His work in the Air Force was mostly hands-on troubleshooting. Cal Poly focuses on the more theoretical and mathematical aspects of electronic engineering.

But he still thought some courses were "a joke."

"EE 112 (Introduction to Engineering) explained what engineering was about and what electrical systems were about. I already knew all that from the service," he said.

Glaeser noted that support for students is not always available from the university. He said, someone needs to figure out a better system for transferring classes.

"It's the students who are hurt and we don't seem to be a high priority," Glaeser said.

BASEBALL: Poly can't afford a CCAA loss

From page 8

during a three-game homestand with San Bernardino, but the Coyotes coaching staff elected to wait until last Sunday to play the game.

Dominguez Hills Head Coach George Wing, feels that the forfeiture has little effect on his team's playoff picture.

"(The forfeit) really doesn't effect us one way or another," Wing said. "We still have to win two of three from Pomona to win the conference."

"It's unfortunate, however, that the season could go down to an administrative mistake. The people involved didn't look ahead that one of the teams is in a title race. If I was Riverside, I'd be real upset."

Cal Poly Interim Head Coach Kent Agler was unavailable for comment at press time. He was in Northridge Tuesday coaching his team in a 5-3 loss

to the Matadors.

Cal Poly is now currently third in the conference, one game behind UC-Riverside (36-17, 18-11 CCAA) and Dominguez Hills (35-16, 17-10 CCAA) with three games remaining in the regular season.

The Mustangs host Cal State Los Angeles (21-31, 14-12 CCAA) for a single game Saturday and a Sunday doubleheader.

Riverside concludes its regular season today against Los Angeles, while Dominguez Hills closes their schedule with Cal Poly Pomona this weekend.

In the event of a three-way tie for first in the final standings, Dominguez Hills would claim the conference title by virtue of holding a head-to-head edge against the Mustangs and Highlanders.

player in each of four regions.

Cal Poly closed its season with a 13-5 overall record and 3-3 in California Collegiate Athletic Association.

RANGERS: Messier gives teammate kudos

From page 8

the opening period before beating goaltender Rick Tabaracci with 3:28 left with a slick move from the slot.

"I'm sure he's been looking forward to bringing his game to another level, and he did that certainly in the third period," Rangers coach Mike Keenan said. "I'm very pleased for him."

The points gave Leetch 17 for the playoffs (five goals, 12 assists) and moved him into second place on the scoring list behind Toronto's Doug Gilmour (19). Leetch has scored at least one point in each of the Rangers' nine playoff games and has been a major factor in New York's 8-1 postseason run.

Leetch said playing on the power play has been a big boost for him.

"A lot of it has been where we're up a man and I get a little extra time," said Leetch, who has four goals among his nine

power-play points. "Some of the other ones are just thrown in front of the net and the guys are working hard to screen and get rebounds."

No one has been working harder than Leetch, though.

"He's just continued to improve," said Rangers goaltender Mike Richter, a teammate of Leetch's from there U.S. Olympic hockey team days. "He's always been good offensively. But defensively, he's getting better and better. He's becoming one of the best two-way defensemen in the league."

The playoffs, and the 1993-94 season in general, have been uplifting for Leetch — who spent the offseason wondering if he would ever be the same following a neck injury last year.

Leetch's career was in danger after he sustained nerve damage in his neck area during a game in St. Louis last season.

Forfeit moves Poly within one game

CCAA opponents call ruling a foul ball

By Tim Vincent
Daily Staff Writer

With less than a week left in the regular season, the Cal Poly baseball team received a forfeit win from Cal State San Bernardino, pulling within a game of conference co-leaders UC-Riverside and Cal State Dominguez Hills.

The Mustangs, 29-20 overall and 16-11 in the California Collegiate Athletic Association entering Tuesday's non-conference game with Cal State Northridge, were notified of the forfeit Tuesday by CCAA Commissioner Tom Morgan.

According to Cal Poly Sports Information Director Eric McDowell, the game could not be played this week because San Bernardino has already completed its NCAA-allotted 22-week playing season.

The game, which was rained out March 25, was scheduled to be made up last Sunday, but a rainout Saturday against Cal Poly Pomona moved that series' doubleheader to Sunday.

According to UC-Riverside assistant coach Doug Smith, the forfeiture tightens the conference race, but his team needs to concentrate on its schedule and not that of other teams.

"Our feeling is that we control our own destiny," Smith said. "We can't control what goes on up there (in the CCAA commissioner's office)."

"I don't like the idea of the forfeit taking place. I don't think it's appropriate. I would hate to see a forfeit involved in deciding the CCAA race."

But with Saturday's rainstorm, the Mustang coaching staff had to choose between a Sunday home doubleheader versus Pomona or a road trip to San Bernardino.

"The Pomona game took preference because they were in town," McDowell said. "The San Bernardino game still wasn't definite as of Saturday. When it came down to the rainout, it was an easy decision to play Pomona."

McDowell said that the Athletic Department was informed Monday of San Bernardino's ineligibility to play the game. The CCAA commissioner's office then ruled in Cal Poly's favor after concluding the Mustangs had exhausted every effort to get the game played within the regular season.

The Mustangs attempted to reschedule the contest May 1

AP Quick Roundup

Browning released from hospital

Tom Browning of the Cincinnati Reds was released from the hospital Tuesday, one day after fracturing his left arm and collapsing during a game.

The team's trainer said the 34-year-old left-hander is likely out for at least two months although there is a chance he could pitch again this season.

The freak injury came during the sixth inning of Cincinnati's 3-2 victory over the San Diego Padres on Monday night. The severity of the break was such that the popping sound of Browning's upper left arm could be heard in the pressbox.

Browning spent Monday night at Scripps Clinic, and his arm was placed in a splint and sling. He was scheduled to return to Cincinnati on Tuesday night and be examined Wednesday by Dr. Scott Jolson, the team orthopedist.

"It's possible that he could return this year, but that may not be in his best interest," Reds trainer Greg Lynn said. "But I'm not willing to say he's out for the season, at this point."

Shortly after Browning was discharged, the Reds placed him on the 15-day disabled list.

Browning said through the team he didn't want to be interviewed for several days.

Finchem is new PGA Commish

Tim Finchem worked the practice tee Tuesday, greeting players and receiving congratulations as the incoming commissioner of the PGA tour.

Finchem, the 47-year-old son of a Marine sergeant who was selected Monday to succeed Deane Beman, was taking care of what he called "my first priority" in the transition to his new post.

"It's very important that I meet the players, that they can get a sense of where I feel we are going," said Finchem, who takes over June 1.

Messier says he is not the lone Ranger

By Ken Rappaport
Associated Press

NEW YORK — Mark Messier has been on five Stanley Cup winners, played 186 postseason games, ranks second in playoff points scored and is tied for second in goals.

So when he tosses out a Stanley Cup compliment, it shouldn't be taken lightly.

"It's one of the best playoff performances I've ever seen," Messier said after teammate Brian Leetch had three assists and the game-winning goal in the New York Rangers' 4-3 victory over Washington on Monday night.

The win gave the Rangers a 4-1 victory in the best-of-7 series and sent them into the third round of the playoffs.

Leetch set up the Rangers' first three goals in

Poly duo defeats top seed

Berkowitz-Walter pair is only Poly hope left

Daily Staff Report

The Cal Poly women's tennis team's last grasp at Division II national glory survived to see another day.

The unseeded doubles team of sophomore Michelle Berkowitz and freshman Christine Walter upset the No. 1 pair of Ilka Mathiak and Silke Kraft from Armstrong State 6-3, 7-5 Tuesday in Pomona.

"They played great tennis today," said Head Coach Chris Eppright. Down 2-5 in the second set, the pair won the last five games to end the match.

"At that point, they just took control and played fantastic tennis to come back and upset the No. 1 seed," he said.

Berkowitz and Walter advance to the third round to take on the No. 3 seeded team of Dee Mercuri and Bee Amesbutr. The Mercuri-Amesbutr team hails from tournament host Cal Poly Pomona.

In the third round of singles play, Cal Poly's No. 1 player, sophomore Tracy Arnold, bowed out to Adelphi's Iku Kunugi 6-2, 6-2.

"The girl Tracy faced was really good," Eppright said. "(Arnold) was also tired and worn out."

Kunugi was seeded fifth in the tournament — four spots above Arnold.

Arnold's season ends sooner than it did last year. Last season, Arnold ventured into the quarterfinals before losing to Rebecca Huerque 6-4, 3-6, 6-1.

Arnold closed out her season with a 12-10 record.

She was the only Cal Poly singles player to remain alive after the first day of competition Monday. Her teammates sophomore Allison Light and Berkowitz won their opening matches before joining their teammates spectating in singles play.

On Tuesday, Light was named the West Region Penn Player to Watch — an award given to one
